

Irini Koufalis, founder of European Body Concepts, began her career as an esthetician in 1988. For the first 5 years of her career, she found herself testing various professional products.

Although they were good, they were not up to her standards. While striving to deliver visible results and the best possible care to her clients, she began formulating her own natural and scientifically proven products in 1993.

In 2004, Irini expanded her line to cosmetics, which are mineral based.

Today, her products include everything you need to bring out the best in your skin. Toners, exfoliants, masques, cleansers, and makeup. Irini's passion is taking the best possible care of her clients.

“Your beauty, well-being, and confidence is of the utmost importance to me.”
